

Professional Certificate in Renal Nursing
腎病護理學專業證書
HS056A

Programme Objective

With the advanced technology in medical diagnostic and screening tests on renal disorders, registered nurses are expected to continue their clinical update. The programme will equip nurses with specialist knowledge and clinical skills in renal nursing with the aim of preparing them to take up the role of Advanced Practice Nurse in a general hospital setting or in community based renal centres. The programme focuses on epidemiology, comprehensive and focused assessment of patients with renal condition, medical approach to treatment and care, handling and application of dialysis; clinical management of patients with different stages of renal condition in hospital, community- based renal centres and or home care.

Learning Outcomes

On completion of the programme, students should be able to:

1. Acquire specialist knowledge on renal disorders in nursing practice ;
2. Conduct nursing assessment on patients with acute and chronic renal disorders ;
3. Implement evidence based nursing care to patients with renal disorders ;
4. Coordinate with multidisciplinary teams and assist patients cope with problems arising from renal disorders; and
