Logistics and Transport Programmes series

Hong Kong is situated at the centre of Asia, a strategic location for international logistics and trade. The logistics and transport industries are therefore vital to Hong Kong's success. HKU SPACE has been offering logistics and transport programmes for 30 years to facilitate those interested to acquire the necessary vocational and professional knowledge and qualification to join or further develop in this industry. The programmes offered in this discipline range from certificate to bachelor degree level and most of these receive professional accreditation from The Chartered Institute of Logistics and Transport. Graduates of the Professional Diploma in Logistics and Transport Management are fully exempted from the educational requirements for Chartered Membership (CMILT). This makes studying this programme as one of the most popular routes to acquire this professional qualification.
